A Garden for Every Home

June, 1940

WE HAVE combined our offices and warehouse at 62 West 45th Street, New York City, one short block from where we have been located for the past 21 years and here old customers and new ones will be welcomed.

The merchandise herein offered is contracted for by us from the finest growers in the world, each a specialist in his particular field, and we offer same with the assurance that no finer quality can be secured. Place your confidence in the thirty-eight years of practical experience enjoyed by every member of this company.

As this catalogue goes to press Holland is at war and the importation of Tulips, Hyacinths, Crocus, Snowdrops, Chionodoxas, Scillas, and Muscari is extremely doubtful. Prices on all other foreign and domestic grown items may be affected by this, *therefore all prices published herein must necessarily be subject to change without notice.* We are a reliable source of supply and our prices will always be the fair ruling market prices at time of delivery.

Please give your consideration to American grown items this year, such as bulbous Iris and Narcissi for planting out, Gladioli, Freesias, Iris, Lilies, Anemones, Ranunculus, Polyanthus Narcissi for greenhouse forcing. There will be a big demand for these items this Fall.

PLEASE PLACE YOUR ORDERS AS EARLY AS POSSIBLE

BUSINESS TERMS

Prices quoted in this catalog are net 30 days and all goods are offered subject to being unsold on receipt of order. Shipments travel at the purchaser's risk after they are in the hands of any common carrier.

If your name is not on our books, may we request that you remit cash, check or money order, or kindly furnish us with satisfactory references.

To secure consideration, all claims should be made immediately upon receipt of merchandise.

Packing is charged extra at actual cost to us.

NON-WARRANTY

While we take precaution to ship only such merchandise as will produce satisfactory results under normal conditions, the nature of our products is such that we cannot guarantee description, quality or productiveness of seeds, bulbs or plants; and cannot hold ourselves responsible for the crop. Only under such condition can we execute orders for merchandise covered by this catalog.

IDEAL DARWIN TULIPS

Ideal Darwin Tulips are considered the finest type raised to date. They are superior to most of the "Darwins" now in commerce, and have become outstanding for exhibition purposes. A remarkable feature of this gorgeous type is the extreme earliness of many of the varieties and their adaptability for early forcing.

| CAMPERNELLE RUGULOSUS, DOUBLE. Double yellow..... | 1.10 | 8.00 |

Mixed Narcissi for Naturalizing

These are particularly suitable for mixed borders, for naturalizing in shrubbery, by woodland walks, in the woods by streams and lakes, or in semi-wild outlying positions. They are perfectly hardy and will flourish and increase for years. Bulbs may be planted either in partial shade or in the full sun and they seem to thrive equally well in any ordinary soil.

We recommend that a mixture of the Large Trumpets and Short Cups be planted together as in this way the flowering period is extended. Exceptionally fine mixtures are offered as follows: 100 1000

| | | |
|---|--------|---------|
| Large Trumpets, Mixed | \$6.00 | \$55.00 |
| Short Cups, Mixed | 5.00 | 45.00 |
| Large Trumpets and Short Cups, Mixed | 5.50 | 50.00 |

AZALEA RUTHERFORDIANA

They are a distinct improvement of the type known as tender forcing varieties.

They are the result of crossing Azalea indica varieties with Japanese Kurume, but involving also, the injection of Rhododendron blood. There are three different types—Single, hose-in-hose, or Semi-double, and Double.

They are more rapid in growth than either the Azalea indica or Kurume, and an important and distinctive feature is the so-called truss structure or formation of the flowering branches of most varieties. Every variety is covered by a **Plant Patent**.

Tree Peonies

(*Paeonia arborea*)

They differ from the herbaceous Peonies in that the stems are woody and the plants are shrubby in character. They flower before the *Officinalis* and *Chinensis* sections. Size of plants varies according to variety, ranging in height from 12-24 inches with several stems. Delivery in Fall or early Spring.

POT-GROWN

Strawberry Plants

For best results pot-grown plants should be planted from July 20th to September 1st.

By exercising care in the selection of varieties, provision may be made for fresh Strawberries from early Summer until late Fall. For the home garden at least three varieties should be planted—one of which should be an early sort, another a midseason sort, and one a late fruiting variety.

EARLY VARIETIES

100

BLAKEMORE. Originated by the U. S. Department of Agriculture. Berries are bright, light red, flesh firm, solid center, excellent flavor.....\$7.00

DORSETT. A recent introduction which is positively destined to lead the commercial field as an extra early Strawberry. Large, bright red berries of perfect quality..... 7.00

EARLY JERSEY GIANT. Long known as the early Strawberry, without a fault and is considered the largest fruited early variety. The brilliant crimson berries have a delightful aroma and a rich, mild "Wild Strawberry" flavor..... 8.00

PREMIER. One of the best of the extra early varieties. Produces, in large quantities, berries of good size, attractive appearance and excellent quality..... 7.00

ROYAL SOVEREIGN. Early to midseason. Excellent for forcing under glass, also good for June bearing outside.....14.00

SUCCESS. An old favorite, the bright scarlet berries are large and uniform in size, color, and shape, and delicious flavor..... 7.00

MIDSEASON VARIETIES

100

ABERDEEN. Huge, bright red berries which are larger than most varieties; a strong grower with dark blue green foliage.....\$7.00

BRANDYWINE. Large, bright crimson berries of excellent quality and flavor..... 7.00

BUNN'S SPECIAL. A glorified "Senator Dunlap," producing far more and larger fruit..... 7.00

CHESAPEAKE. One of the most popular midseason varieties, appealing equally to the eye and to the taste. The bright red berries are large, regular in form and size and of excellent flavor..... 8.00

CORSICAN. Large in plant, berry and crop, preferred by many..... 7.00

FAIRFAX. Another recent introduction, and one which cannot help assuming the leadership of the home garden as a second early berry. Its flavor is even richer than that of Dorsett, and the berries are slightly larger and very firm..... 8.00

GLEN MARY. A fine variety of large size, great productiveness and good quality. It thrives best on light, sandy soil..... 7.00

HOWARD NO. 17. A remarkably strong growing second early. Berries large, beautiful and of superlative quality..... 7.00

STRAWBERRY PLANTS, MIDSEASON VARIETIES— Continued

- 100
- JOE.** This most valuable variety ripens just after "Chesapeake," equals it in size, firmness and yield, and surpasses it in color and flavor; succeeds upon almost all soils.....\$7.00
- MARSHALL.** An aristocrat among Strawberries, and with a little care the large, glossy crimson fruits of this delicious sort will produce the very acme of berry perfection..... 7.00
- NEW YORK.** A good, all-around sort, large, colorful berries..... 7.00
- SENATOR DUNLAP.** Firm berries of medium size, uniform in color and shape. Very prolific..... 7.00

LATE VARIETIES

- 100
- BIG LATE.** One of the finest late varieties. Ranks with best in vigor of plant growth, productiveness and quality. Large, bright glossy red berry; excellent shipper.....\$7.00
- GANDY.** A popular, late-fruited variety, large, bright crimson fruit..... 7.00
- LUPTON.** Very much like Gandy, but much more productive and about five or six days earlier. We consider this one of the very finest of the varieties fruited late..... 7.00
- NEW WASHINGTON.** Popular late sort; very prolific, with firm, delicious fruit..... 8.00
- SHARPLESS.** A fine, late variety, producing handsome large berries..... 7.00
- WM. BELT.** An all-season variety, fruited from early to quite late; the berries are large, handsome and full flavored..... 7.00

EVERBEARING STRAWBERRIES

In addition to bearing a good crop in late Summer and Autumn, they also produce heavy crops of fruit as early as June. In order to be sure of a good Fall crop the blossoms should be removed from the plant as they appear from the first to the middle of July.

- 100
- GEM.** This Everbearing Sensation produces sparkling red berries uniformly large in size. They are solid red to the center, juicy, deliciously sweet and very free from acid.....\$10.00
- MASTODON.** This is truly the largest, most delicious and heaviest yielding of all Everbearing sorts. It out-yields some of the finest June bearing sorts during their season, and continues to produce throughout the Summer and Fall berries of amazing size and surpassing quality..... 10.00
- NEW PERFECTION.** This Strawberry has created a sensation in the West. The fruit is plentiful and delicious..... 12.00
- PROGRESSIVE.** One of the most popular and prolific of the Fall-bearing sorts. The berries are smooth and uniform in size and shape, and of a deep crimson color..... 10.00
